25. Chef John noticed that, if he does not use a gas oven, roasted meat remains raw inside or becomes burnt outside (or both). Therefore we can infer that:

A. if the meat is well cooked inside, it must have been cooked in a gas oven

B. if the meat is well cooked inside or is not burnt outside, it must have been cooked in a gas oven

C. if the meat is well cooked inside and is not burnt outside, it must have been cooked in a gas oven

D. if the meat is raw inside, it has not been cooked in a gas oven

E. if the meat has been cooked in an electric oven, the meat is raw inside and burnt outside
